In the world of movies, the movies that have the loudest voices are the ones that matter. The nominees this year included: BlackKklansman (Get Out) Ford v Ferrari (The Italian Job) Knives Out (Scary Movie) Mary Poppins Returns (Mary Poppins Returns) The Favourite (The Favourite) Once Upon a Time in Hollywood (Once Upon a Time in Hollywood) 2020 is a time of very big change. The virus, while mostly a health issue, has brought with it major financial repercussions. Globes host, Emma Kenney, has an important perspective on how the situation has affected the kind of movies that are being produced right now, and how they connect to the world that we are living in. Music: "Mr Saxobeat" by Colin de Grandhomme. Follow Emma Kenney on Twitter. Produced by Casey O'Brien and Laura Aranda. Theme music is "Marbles" by Matt Kahn. Mixing by Matt Chapin and Greg Temkin. Low-res transcription courtesy of Sarah Ditung.Q: Android ADT - how to unzip/unrar with ADT As the topic says, I'm having a problem getting the ADT to let me unzip or unrar. I've tried unzipping a zip file and creating a new one with the same name with no luck. Please help. A: Android has only the ability to unzip archives so they are always in a compressed.zip format.

Technical Field The invention relates to methods of bonding sheets, such as glass sheets, to each other or to substrates, such as the roof of an automobile. 2. Discussion of the Related Art Automobiles have roofs. Typically, the roof is formed of a single sheet of glass that forms the visible portion of the roof. The roof typically has a decorative trim above the sheet of glass that goes along the periphery of the roof. The sheet of glass may be bonded to the decorative trim. The decorative trim may have one or more holes formed therein. This allows for the placement of fasteners in the decorative trim to provide a secure connection of the sheet of glass to the decorative trim. This bond provides a peripheral edge for the sheet of glass and is sufficient for the roof to serve its purpose. It is often desirable to use glass sheets that have a solar control coating on one or both sides of the sheet. The coating on the sheet, as is understood in the art, may reduce infrared solar radiation that causes heating of the coating on the surface of the roof and therefore increase the fuel efficiency of the motor vehicle. Solar control coatings may be bonded to the glass sheet to provide an interface with the coating. However, when the sheet is a single sheet of glass, the peripheral edge is directly bonded to the decorative trim, which allows the thermal insulation between the sheet of glass and the underlying substrate. This may reduce the effectiveness of the solar coating, as the solar coating may transfer a significant amount of heat through the thermal insulation to the underlying substrate and the ambient air.Laser ablation of myocardium in the dog. Laser-induced ventricular myocardial lesions were produced in anesthetized dogs. The dogs were instrumented for the recording of arterial and intracardial pressures, for the recording of left ventricular pressure by a micromanometer in a micropressure probe, for the recording of the electrocardiogram, and for the determination of the left ventricular rate by left ventricular pressure and impedance cardiography. The laser source was f678ea9f9e
